A Sensory Garden

is a hands on experience that will excite all of the senses. This is an area where kids will be able to interact with their surroundings to taste, touch, smell, listen, and look. While it is particularly beneficial for students with disabilities, it is a fun education tool for every students benefit.

The garden will also include play stations. In order to include these, we need help with supplies.

- Old cd's
- Old keys
- Paint can lids
- Piant
- Mirrors
- Ribbon
- Twine or string
- Bamboo
- Metal pipes
- Metal pan lids
- Wood scraps or boards
- Logs
- Plants!

We are looking for plants for our sensory garden. All must be non-toxic!

- **Smelling section plants** that have a scent, good and bad. – herbs work well *(Example: Basil)*
- **Tasting section plants** that can be tasted – herbs, fruits, veggies, along with plants that have leaves and flowers that can be eaten *(Example: Mint)*
- **Visual section** – plants that are visually stimulating. Can be vibrant color, interesting shape, etc. *(Example: Passion flower)*
- **Listening section** – plants that make noise – have seed pods that rattle, grasses that make sound with wind. *(Example: Northern Sea Oats)*
- **Touch section** – Plants that feel interesting. *(Example: Lambs ear)*
